Election/Restrictions

1. Claim 9 is generic to a plurality of disclosed patentably distinct species comprising A) using a heated compression bar (Figure 5), B) using a heated compression wheel (Figures 6 and 9), and C) using an infrared heat source in conjunction with a pressure wheel (Figures 7 and 8). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. **It is noted that the remainder of the claims in the application are directed to species C.**
2. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
3. A telephone call was made to David Henn, the attorney of record on 6/17/04 to request an oral election to the above restriction requirement, but did not result in an election being made because the voice mail box of the phone number of record was disconnected.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
